

Timers - Just Timers

Timers

Name
Duration (sec)

Active?

Time Remaining

Paused

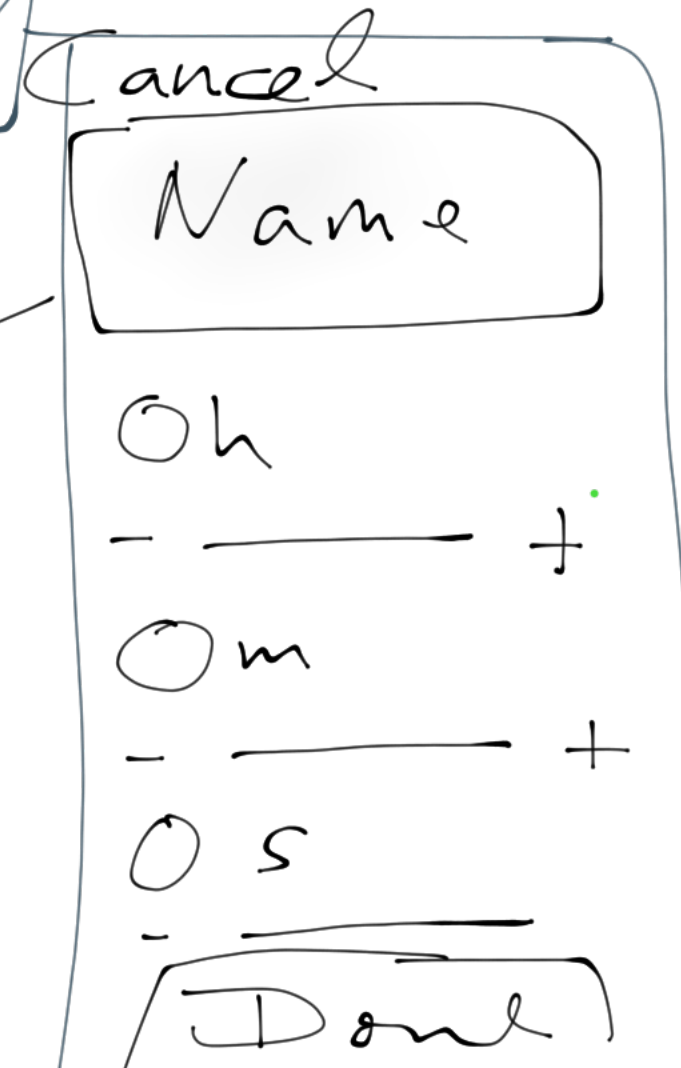

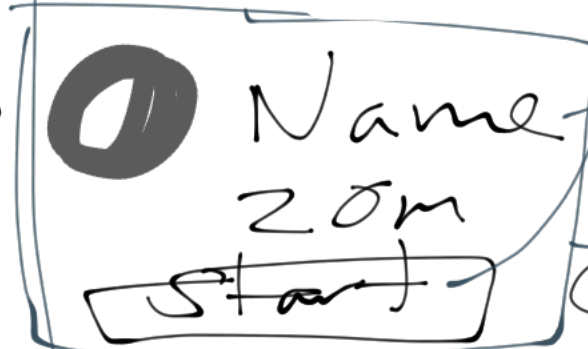

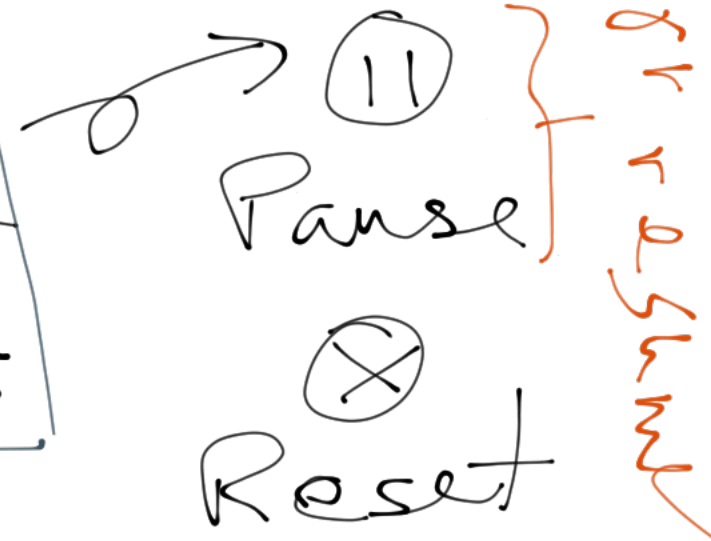

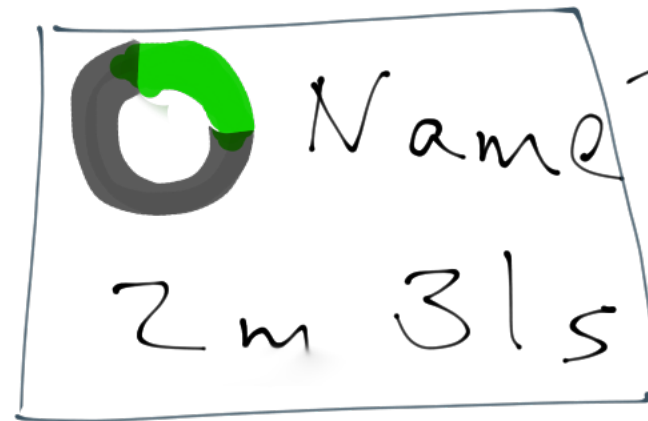

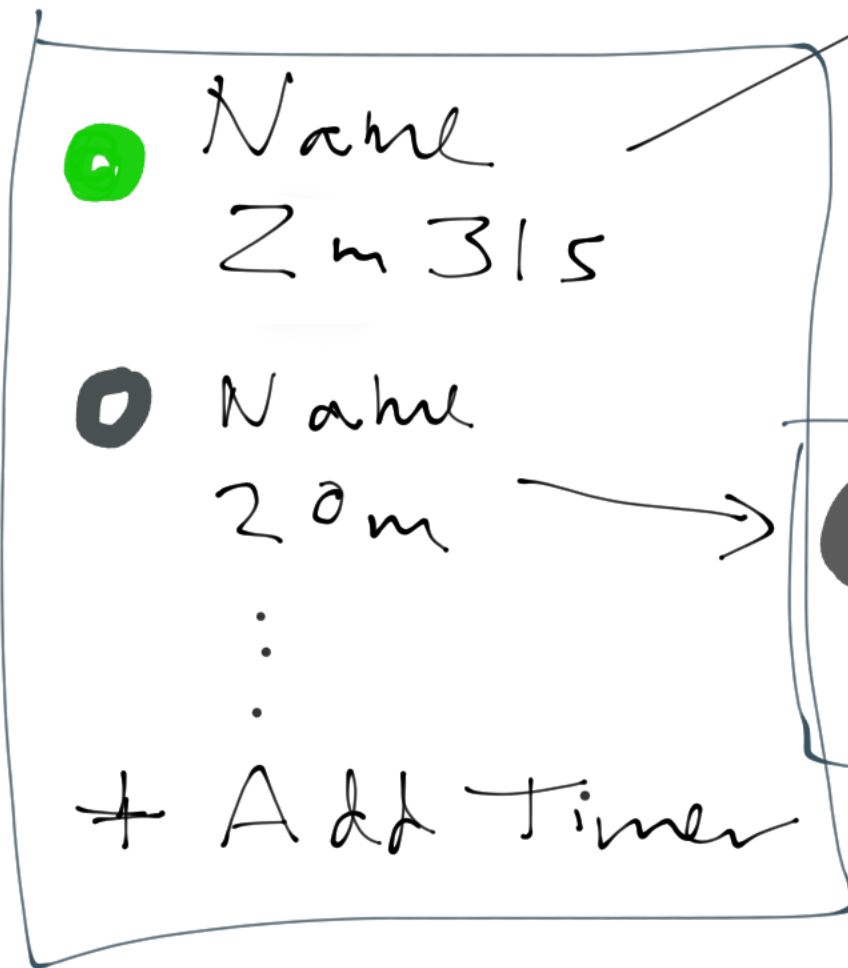

TID
Fire Date

calculated, except
when paused, then need
to store it

Paused
timer
is
active

Multiple
active?
If not,
could
track
active
timer
separately.

Main App

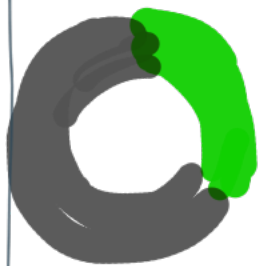

present
recording
UI

Glance

shortest
active
timer if
any

most
recently
used

Name

2m 15s

<Paused>

4V) other active
timers

Name

3m

No active
timers

or a row of rings?

or

Notification

 Name
Done

pulse

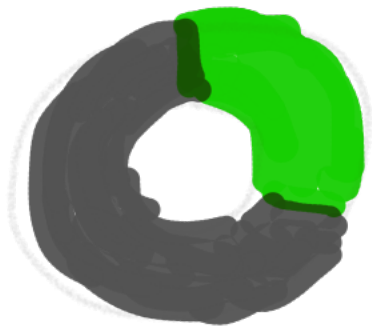

(N) rather
frames

} Maybe a
row of
r bytes?

0000

or

0000

Point of Time

- circumference should represent timer's full duration
- green bit is elapsed time.
- showing them together w/ different durations might be confusing

Maybe small
things all
ways solid?
